Game Development

Spektr | Solo Gameplay Programmer, StarloomStudios Nov 2026

Steam Early Access | Windows PC

- Built server-authoritative multiplayer mechanics for a five-player asymmetrical horror game in Unity and C# with FishNet, synchronizing combat, hunter health, and round state.
- Optimized scene lighting on an RTX 2060 laptop GPU, raising frame rate from under 30 FPS to consistently above 60 FPS at the highest settings. Exceeded 100 FPS on the same laptop by lowering texture resolution, shadow resolution, and render scale.
- Led art direction and made sound effects with original recordings, synthesis, and Freesound.org samples.

Octoslayer | Gameplay Programmer Aug 2023 – Jun 2024

- Built first-person player physics, interactions, enemy behavior, dialogue, and game-state systems in Unity and C# for a stealth prototype.
- Optimized the prototype with object pooling, occlusion culling, and light probes.

Professional Experience

Full Stack Developer II | New Level Innovations Jan 2025 – Jun 2025

- Built React Native and Flutter interfaces, integrated Firebase services, and wrote unit tests.

Teacher's Assistant | The College of New Jersey Aug 2023 – Dec 2024

- Helped 60+ students debug projects across four college courses and delivered an 80-minute Unity/C# lecture on inheritance through a modular weapon-switching demo.
- Helped launch an XR development workflow for Apple Vision Pro, Meta Quest 3, and Valve Index.

Coding Instructor | CodeWizardsHQ Mar 2022 – Jan 2023

- Taught programming to 300+ K–12 students and led an internship program mentoring high school students through hands-on coding projects.

Technical Skills

Languages C#, C++, Python, Java, JavaScript

Game Development Unity, Unreal Engine 5, FishNet, Git, multiplayer, profiling, sound design

Education

The College of New Jersey | Bachelor's degree in Interactive Multimedia
